ACCESSIO

Enable unattended access for all your branches
Secure, Automatic, Contactless

Radicula s.r.o., https://accessio.online

How does it work

The solution from start to finish

- Integrate with your branch

- Define the subscription and payment

- Access

The branch integration

Doors
the standard solution

- ideal for small branches

- always depends on the current situation

  - can be integrated into existing system

  - (tested) Erbi lock installation

- consultation required

Turnstile
alternative for bigger branches

- for branches requiring strict access control

- consultation is always needed to find a tailored solution

AI cameras

detect and count people

- AI camera at entrance can count people

- (Planned) The camera on the reader detects the face and takes a picture when you enter
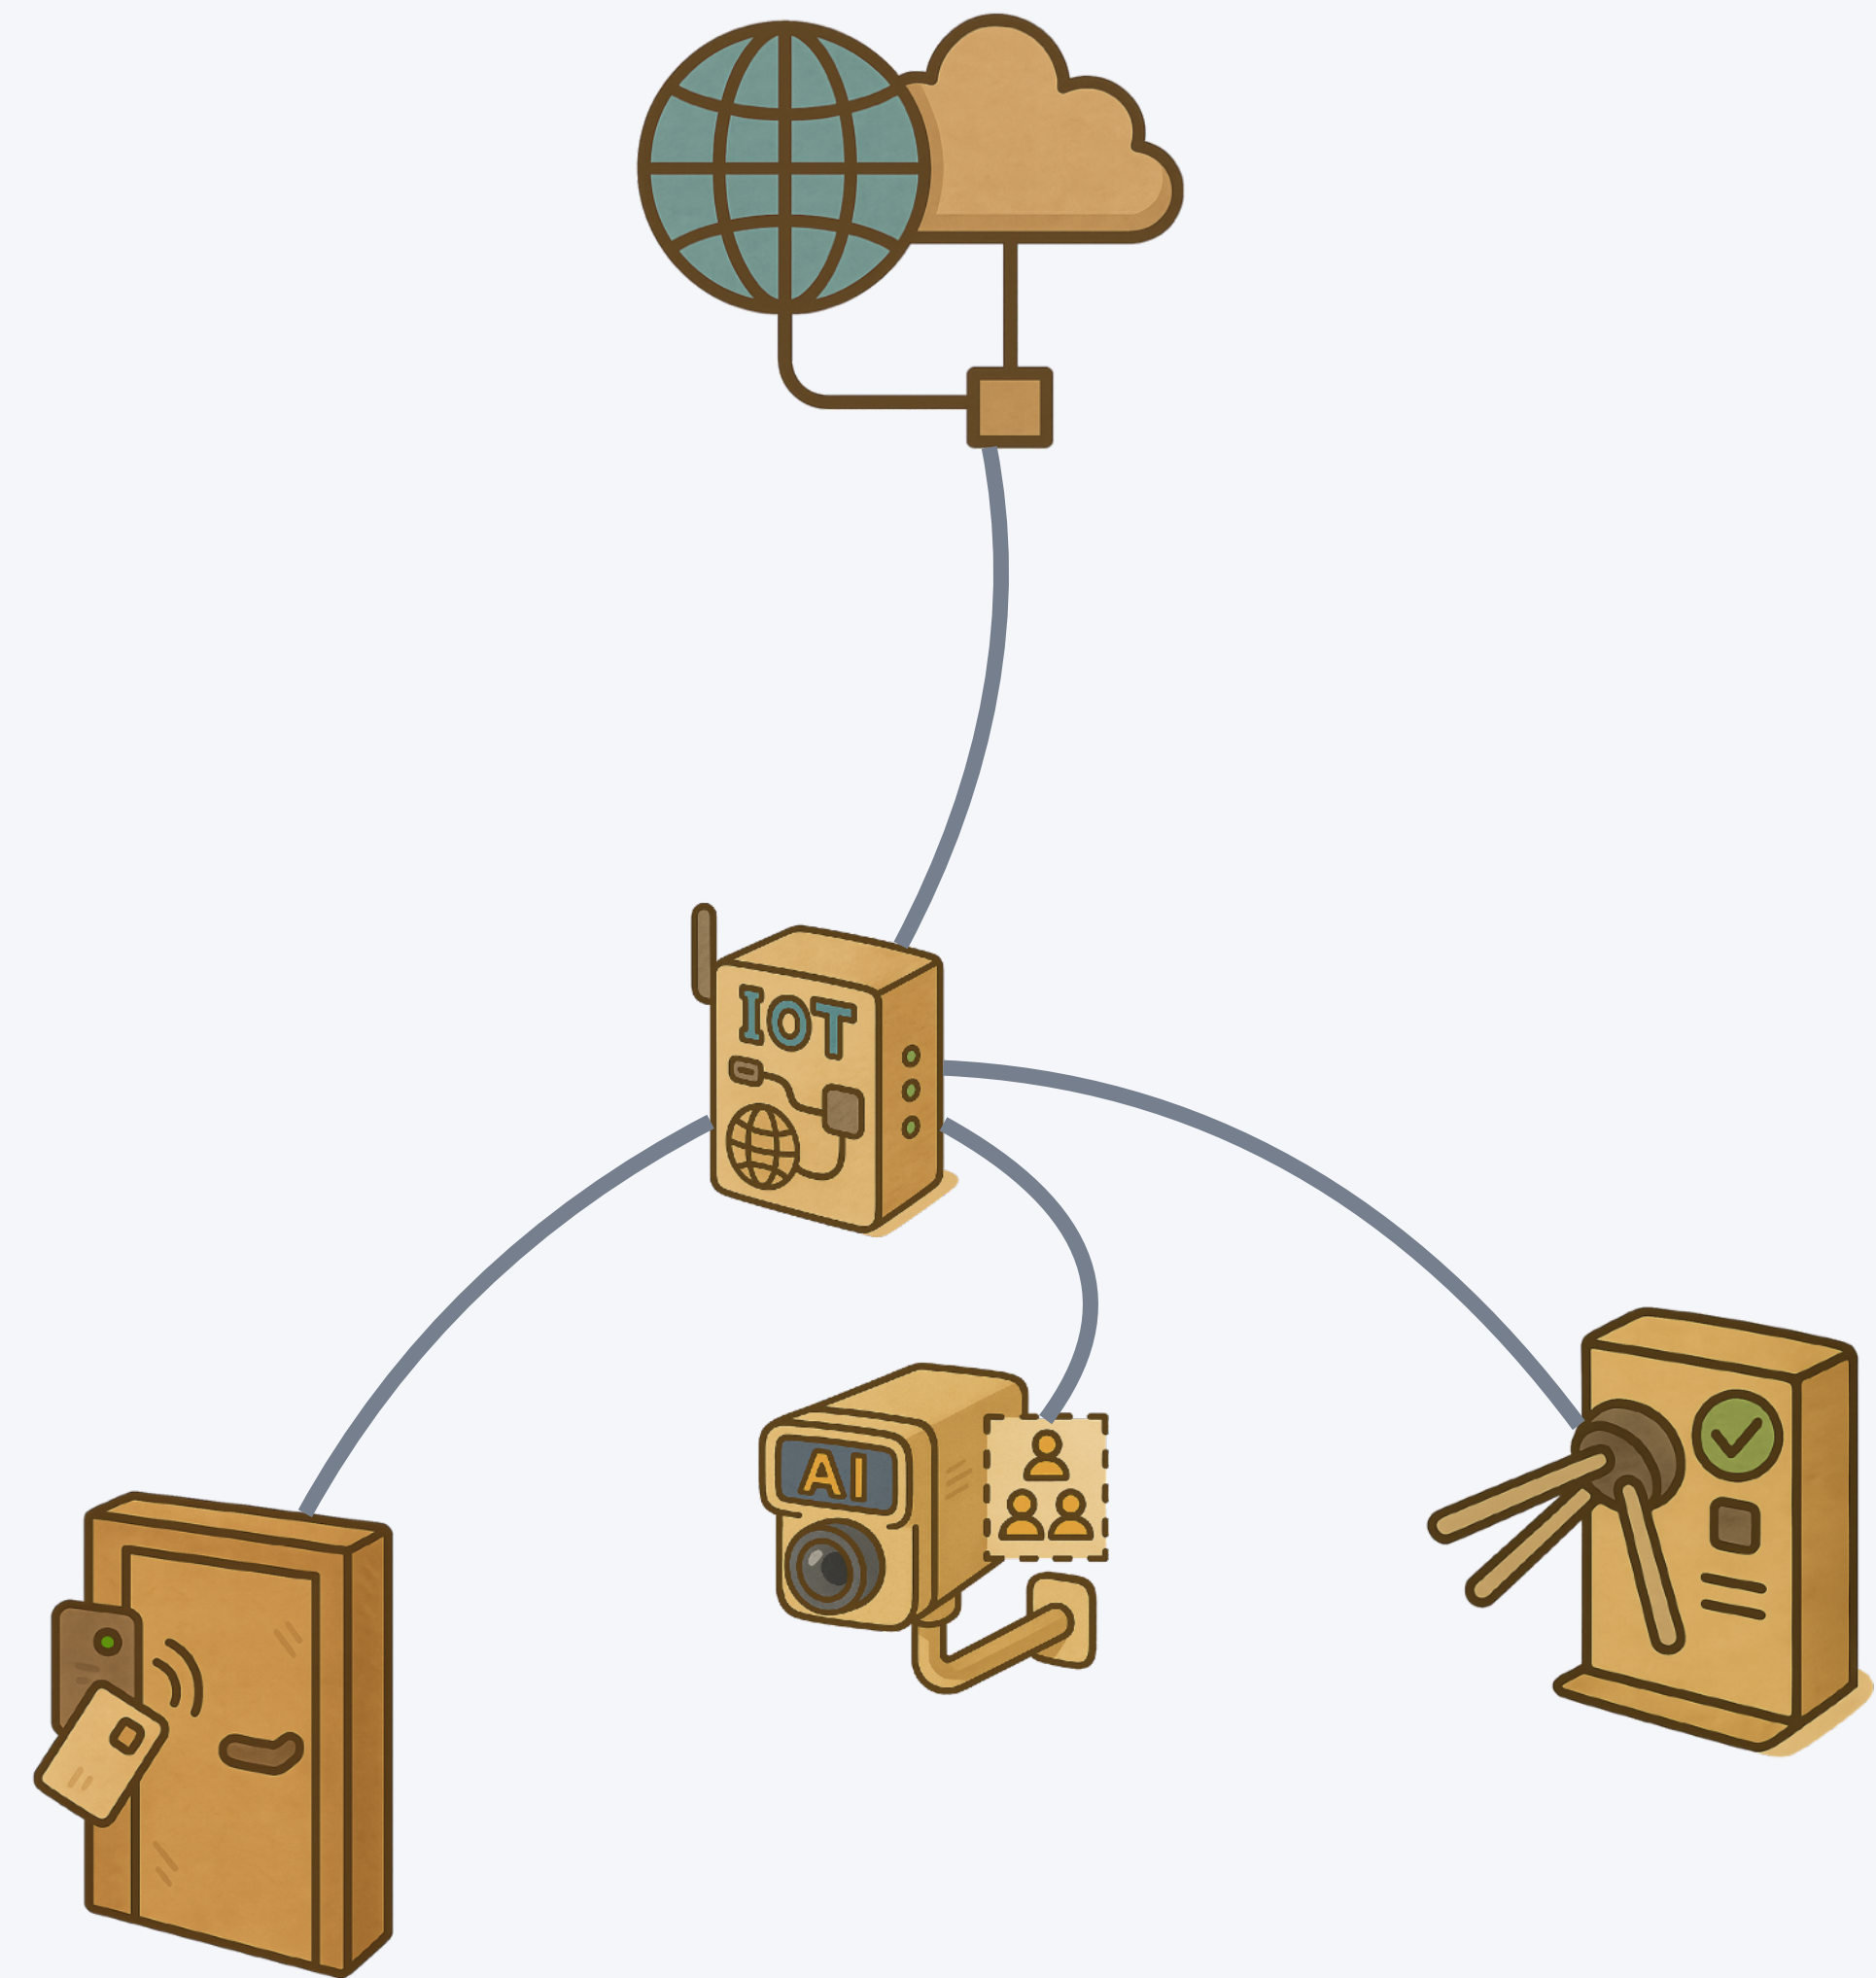

Connect

branch to the internet

- secure connection enables remote control

- easy installation

- devices are remotely managed

Subscription and Payment
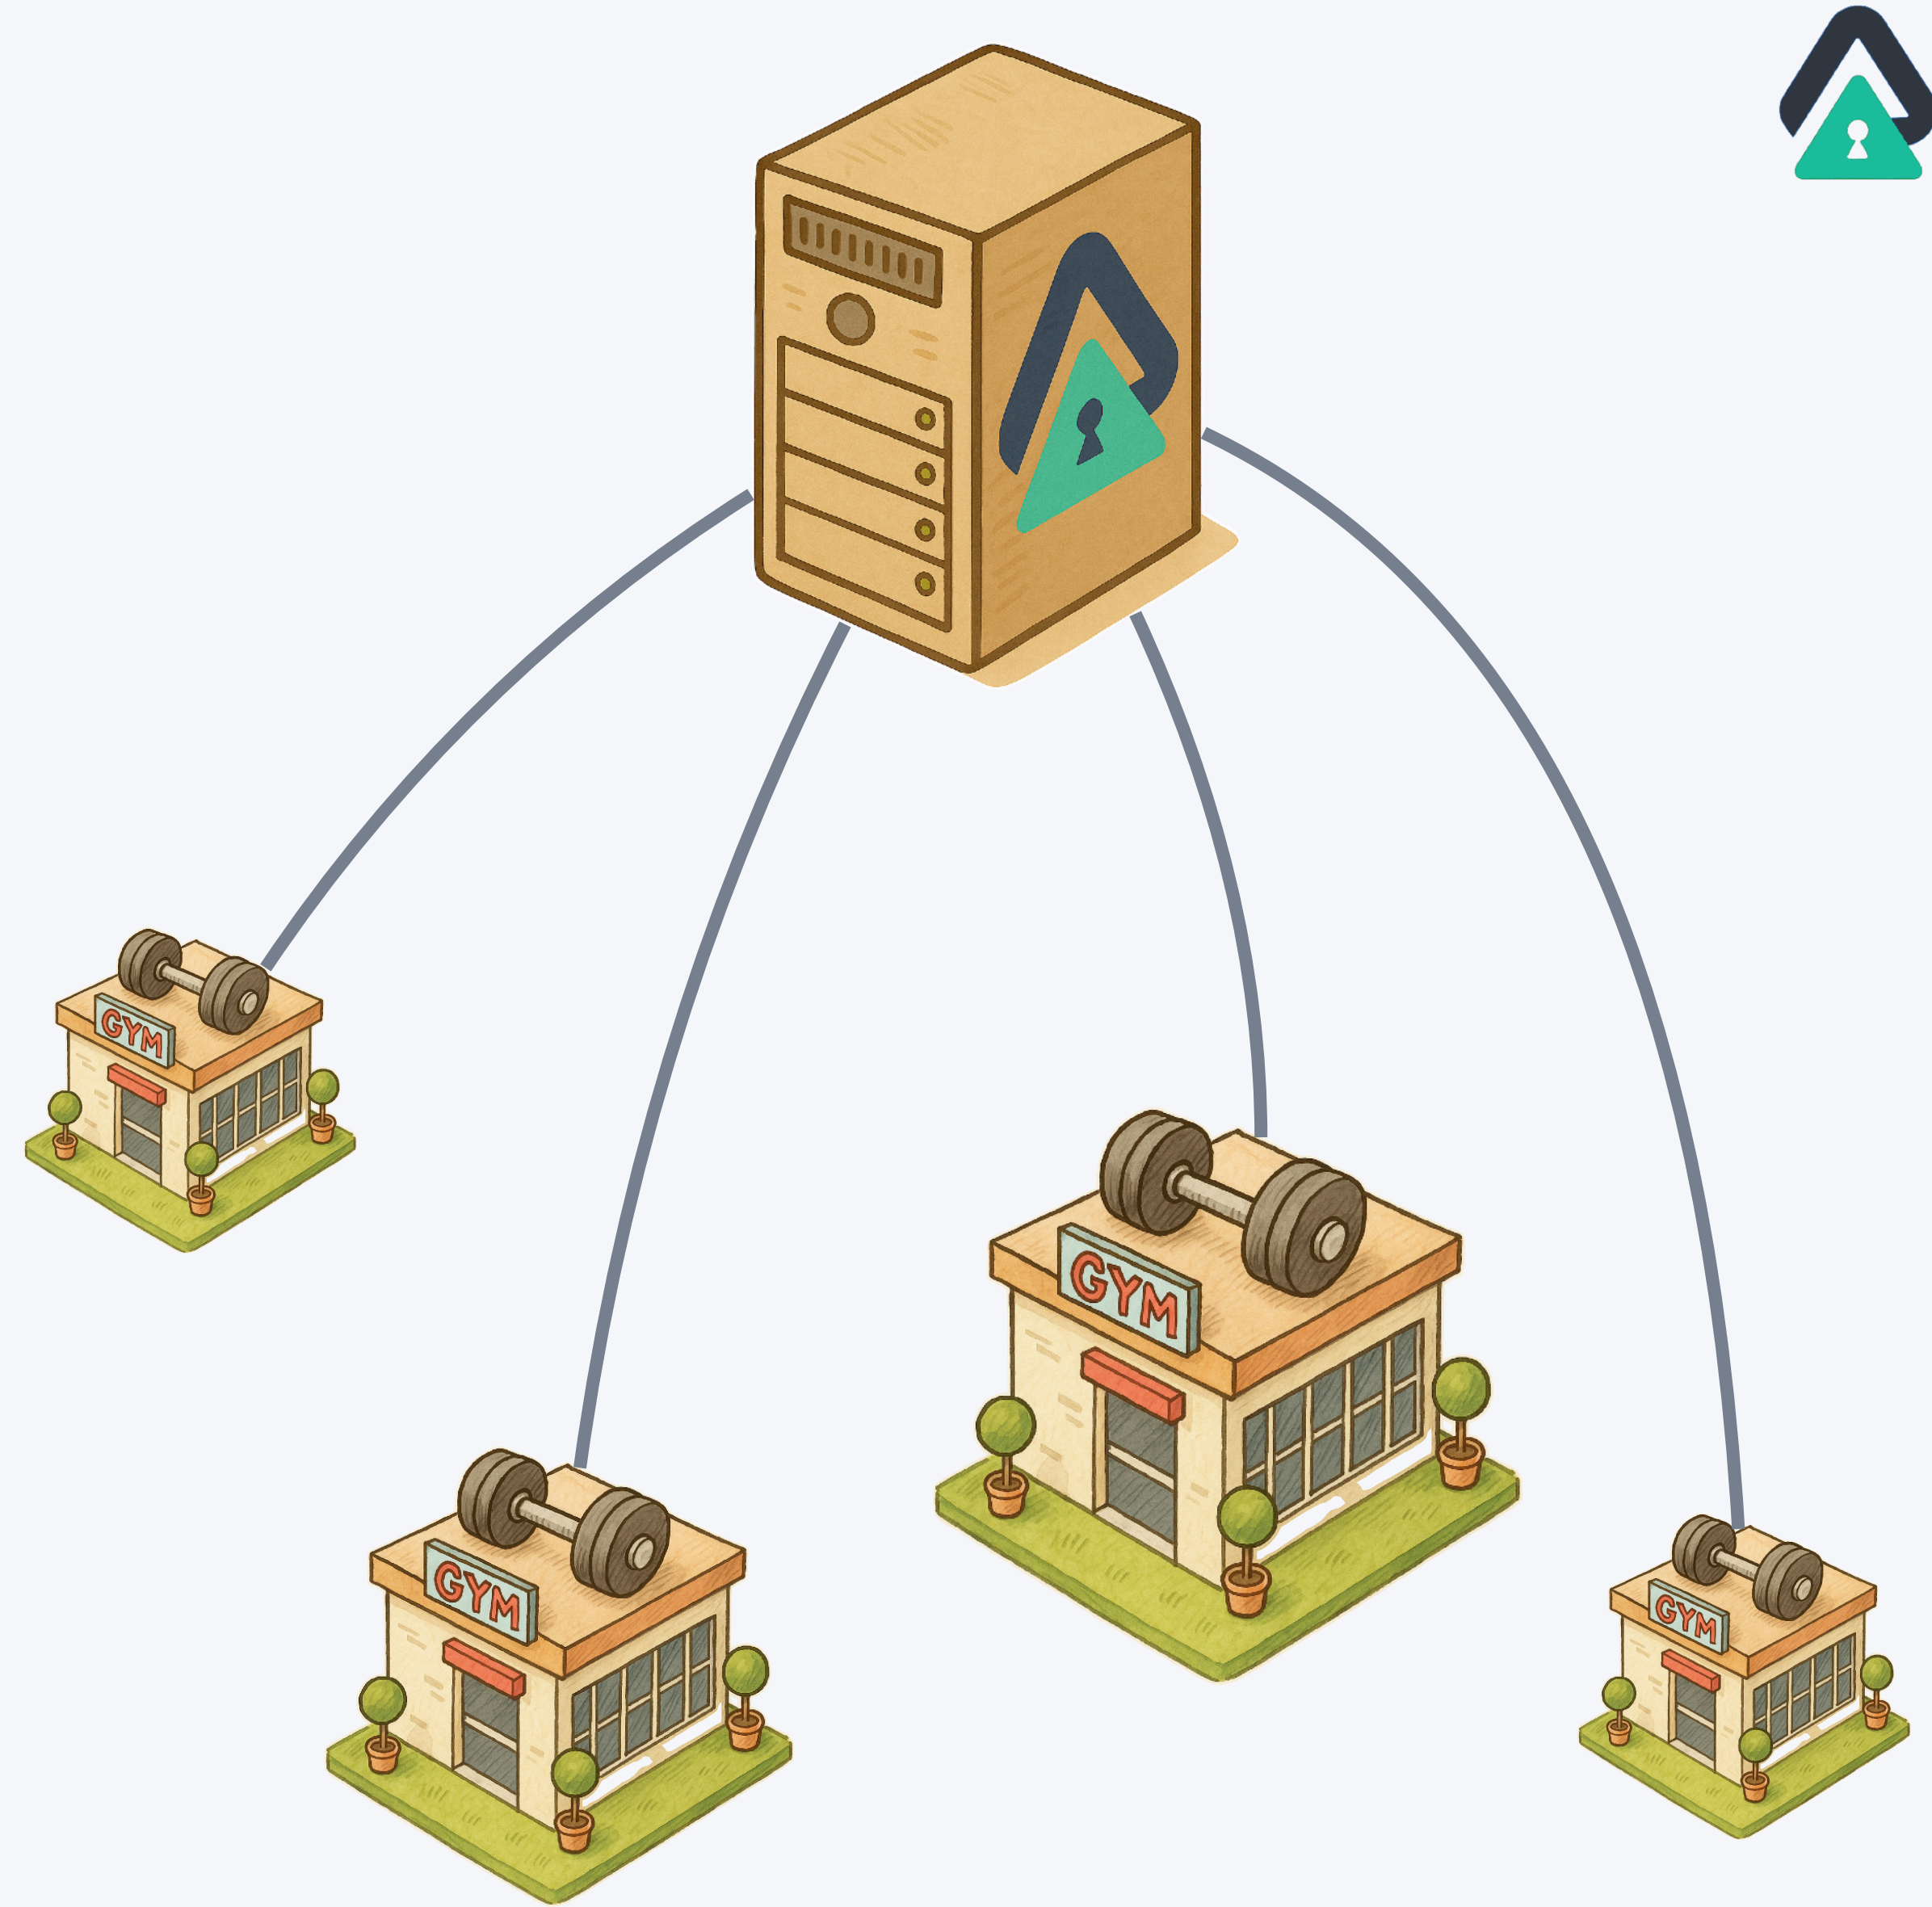

Branches, zones, rules

allows flexible subscription setup

- Access can be defined easily

    - PAYED -> entry allowed

- Or complex

    - Cardio zone subscription payed -> entry to branch and cardio zone allowed

- Roles for cleaning are also possible

Branches
in one place

- ACCESSIO allows you to manage any number of branches

- Connection is always secured and monitored for outages

- Each branch can see changes in the rules immediately, so access can be blocked without delay

Zones

within branches

- zones allow you to define premium sectors, such as a swimming pool or sauna

- Zones can be linked to other subscriptions, credit or number of accesses

- each zone generates its own access statistic
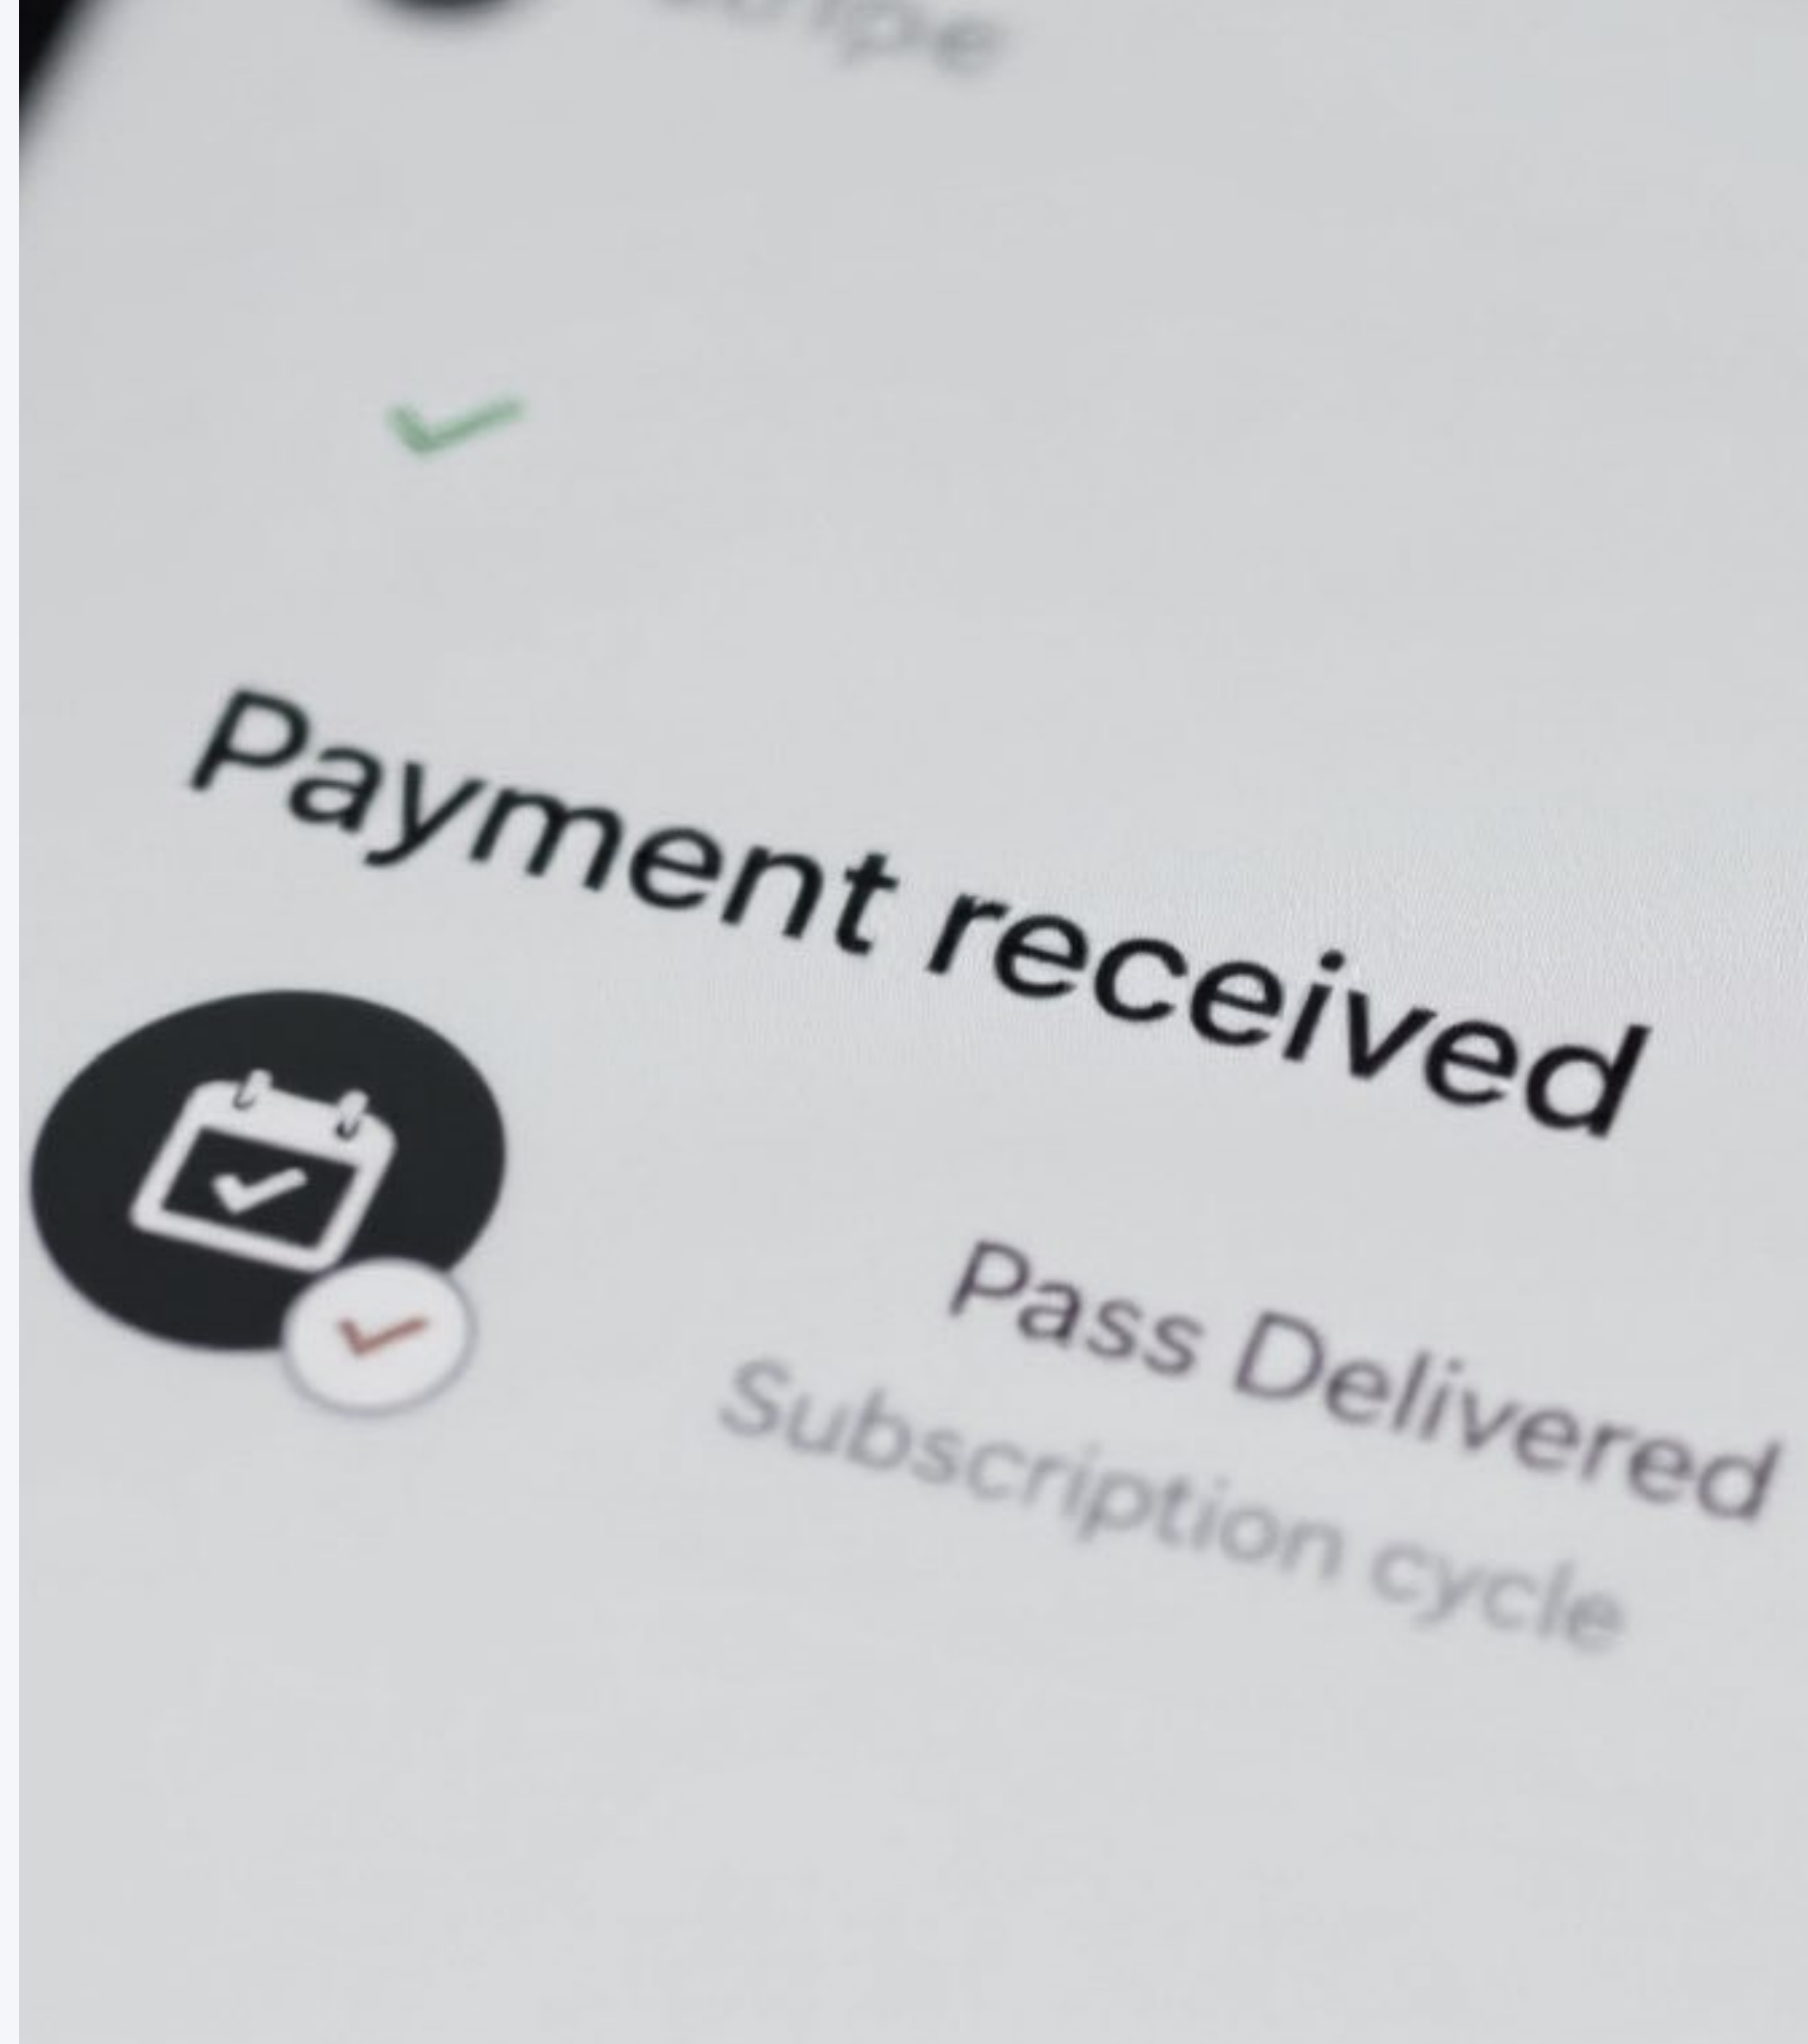

Access rules and roles

Smart access control

- Different roles for different users (customer, cleaning, etc.)

  - Assignment to different sites, zones or both

- Access by date and time range

- Limit the number of entries

- Access from credit

- Possible combinations

Subscription and payment

Stripe fully integrated

- User and subscription management

- One-time and recurring payments

- Instant activation after payment

- Automatic subscription renewal

Access

Operating rules
can be confirmed via email signing

- after payment, the customer automatically receives the operating rules by email

- after confirmation, he/she will receive an access wallet pass

Flexible access
thanks to smart reader

- **Smartphone**

  - Wallet pass in the phone

- **Backup solution**

  - Access card or keychains chips

  - Not everyone uses the smartphone

Modern solution

Smartphone wallet pass

- digital download after payment

- authentication using biometrics

- customer can enter the branch directly
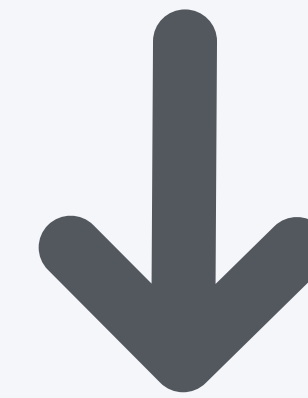

Backup solution

MIFARE

- Not everyone uses smartphones

- Access using digital key

- Access key forms

  - cards

  - keychain chips

  - bracelets

Pricing

One-time installation fee + monthly flat rate

- The price depends on

  - number of input devices (doors/readers), integrations and other

  - number of active users

- Price includes

  - proactive system monitoring

  - maintenance, security monitoring and updates

  - automatic creation and delivery of wallet passes including updates

ACCESSIO
